Learning Points:

1) Excavator operator to ensure that fire extinguisher for the excavator BE serviceable at all times.
2) Be assessible. Not tied to excavator with dead knot.
3) Excavator operator to be alert on abnormal sound and report to supervisor in charged immediately.
4) Regular maintenance
5) DO NOT turn on the engine and take rest in the cabin.
6) Fight fire when it is small. Run! When the fire gets BIG.

Excavator caught FIRE!!!

An excavator was found caught FIRE at one of the projects in Singapore.

The reason was unknown and attempt to put out the fire was in vain.

“Everyone of us deserve the right to return back home SAFE to see our love ones in a good healthy body irregardless which workplace we are from”
