Implementation of Re-bar cover for protruding re-bar works

“A member of public had feedback to MOM of the hazard of protruding re-bars from pre-casted drain at one of our project site.”

Poking hazard posed to the workers and member of public who may fell into the work zone and resulted in sustaining serious injuries.

PVC pipe was used to cover up the protruding re-bars and thus the poking hazard was rectified.

Implementation of PVC cover to others work location:

PVC rebar cover is implemented throughout whole Eng Lam work sites.

100% Compliance! NO SHORT CUT!
